

Coverings 2019

DR TECNICA

DR Tecnica, a manufacturer of ceramic tile display systems, presents several new lines of display unit, some of which are now made of metal, to complement its traditional wooden systems.

- **1. M-LINE** is dedicated entirely to the company's new metal products, and in addition to its more traditional display systems, also includes several models for large-format tiles, which are practical and functional, and feature simple, elegant design.
- **2. SPACE WALL** is a line for the creation of modular, multi-functional walls, with a wide range of accessories, to ensure that products are displayed to best effect by appropriately organising the available space.
- **3/4. HI TECH** and **TILE SHOP** are specific showroom lines that include modular technical counters and tile libraries with unlimited scope for customisation and finishing, for a comprehensive display programme designed to meet the most widely varying requirements.

SERENISSIMA

Serenissima's **Magistra** collection intricately reinterprets the elegance and opulence of antique-effect marble to suit contemporary architecture. From the classical beauty of Greece to the magnificence of Rome and countless examples of contemporary architecture, history has been written in marble. Magistra is a porcelain tile collection that revisits the source material and uses innovative technology to make it the perfect partner for today's design. The collection consists of an interesting selection of sizes and surface finishes to bring out the best in the time-worn effects of each individual piece. The palette of five colours spans the refinement of Marquinia Black, the feminine elegance of Fior di Bosco, the vintage hue of Cappuccino, the original nuance of Paonazetto and the distinction of Corinthian Onyx Beige.
