

COSTRUIRE

COSTRUIRE is the tile collection from Serenissima that expresses the most intense material influences to be found in contemporary architecture, the metal ones, creating unexpected stylistic cross-contaminations and clever combinations, in a highly-refined study of colours and textures.

The metal oxidations, which are the inspiration behind this innovative, versatile, transverse and on-trend proposal, compose a creative mood for brand-new and ever-original solutions.

Six intense chromatic nuances and modular sizes comprise a further asset for the collection: from the traditional 30x60, 60x60, 30x120 and 60x120 cm sizes, offered in 9,5 mm thickness, right down to the large sizes 80x180 and 100x100 cm, with 8.5 mm thickness. To complete the range, there are decorative surfaces and different mosaic proposals, to be used for composing elegant wall inserts.

COSTRUIRE is an essential tool to meet the needs of today's architecture, suited to residential or commercial contexts, as well as large urban projects.

Production type:

Fine porcelain stoneware

Colours:

Metallo Nero | Metallo Ruggine | Metallo Verde | Metallo Rame

Sizes:

30x60 | 60x60 | 30x120 | 60x120 cm (9,5 mm thickness)

80x180 | 100x100 cm (8.5 mm thickness)

Use:

Residential | Light commercial | Indoor and outdoor floors and walls

Manufacture:

Made in Italy
