SERENISSIMA

PETRA

The material authenticity and refined elegance of limestone are reinterpreted in the new Petra collection by Serenissima. Elegant and minimalist, like the limestones that inspire it, the collection captivates with its delicately irregular graphics and the tactile quality of its surface, enhanced by four neutral and natural tones. This design choice conveys balance—between rigor and warmth—and becomes a versatile tool for designers creating commercial, public, and residential spaces.

Petra evokes the character and sense of strength of stone within a luxury-oriented porcelain stoneware project aimed at contemporary interior design. The shades, ranging from light Ivory to deep Tobacco, through Cream and Beige, feature subtle veining reminiscent of fossil traces, adding depth to the surface and inviting combinations with other material inspirations.

The collection's aesthetic simplicity makes it suitable for both flooring and wall cladding, thanks to a format range available in sizes from 30x60 and 60x60 cm to the prestigious 100x100 and 120x120 cm, ideal for large spaces as well as more intimate areas. Completing the range, the outdoor R11 versions—including 2 cm thickness options—ensure aesthetic continuity between interior and exterior spaces.

The decorative Millerighe structure, inspired by textile textures and available in the same hues as the collection, offers architects and designers a solution that enriches the ceramic project, transforming the surface into a lively and dynamic element for original and unexpected cladding.
