

## MATERICA

**Materica** is the new ceramic project by Serenissima that makes use of the extraordinary performance of porcelain stoneware to clothe indoor and outdoor spaces, in line with the most current style trends. Contemporary architecture and design is rife with inspirations clearly rooted in natural stone and industrial cement materials. Materica came about from the fusion of these seemingly distant visual and tactile impressions and evokes a soft and elegant surface, with a decidedly exquisite aesthetic.

The texture of **Materica** is dynamic, but not intrusive, sober, yet eclectic in the coming together of colour and the boldest of patterns. The five colours of the collection are neutral and versatile, suited to today's living spaces, available in multiple sizes and decorative solutions. A collection featuring an understated character that can be appreciated both in the lighter Platino and Ecu variants, and in the more intense and deep colours, Tortora and Nero, while Perla, the intermediate hue of the entire project, is also elegantly distinctive. The range includes sizes with a natural surface and solutions with R11 grip finish, also with 19 mm thickness, to meet your every indoor and outdoor design need.

**Materica** by Serenissima is proposed as a creative capsule, in combination with the multiple ceramic solutions by Gruppo Romani, to develop residential, commercial and hospitality spaces, gracefully incorporating high-end technical finishes within stylistic contaminations which define unique and distinctive visual identities.
