

NEWPORT 2.0

Newport 2.0 is Serenissima's new collection for designing and covering interiors with the elegance of natural wood and the practicality of porcelain tile. The rich detailing of the six woods which inspired Newport 2.0 is enhanced by the colours available in the range, so that they perfectly suit many types of interior design.

Newport 2.0 transmits intense sensations and creates welcoming interiors for relaxing, recharging, and unleashing the most positive creative energy, in both residential and commercial settings. The six colours in the Newport 2.0 range compose a modern, versatile palette, ideal for styling eclectically designed floors and walls.

Its two plank sizes and a variety of mosaic options make the collection very versatile in installation, as well as enhancing the decorative potential of wood, making Newport 2.0 a sober, informal solution for contemporary interior design.

Newport 2.0 is also part of the new Le Plance project, which brings together the most evocative wood-inspired solutions in the Serenissima catalogue, characterised by the large 26.5x180 cm plank size. *New Ash, New Birch, New Ebony* and *New Fir* are the four colours included in the Le Plance project.
